Relevant Experience

Flutter Developer @ Upwork
March 2020 – Present // Remote

▹ Write modern, performant, and robust code for a diverse array of client and internal projects
▹ Work with a variety of different languages, frameworks such as JavaScript, React Native, Dart, Flutter, etc.
▹ Communicate and collaborate with muli-disciplinary teams of engineers, designers, producers, clients, and stakeholders on daily basis

React Developer @ Upwork
Jan 2019 – April 2020 // Remote

▹ Worked with a team of three designers to build a marketing website and e-commerce platform, an ambitious venture originating from Northeastern
▹ Tested sites in various browsers and devices to ensure cross-browser compatibility and mobile responsiveness
▹ Interfaced with clients on a weekly basis, providing technological expertise and knowledge

Projects

Gotya
It is an on-demand courier service that purchases, picks up, and delivers products ordered through its mobile app. It aspires to be a multi-category app with food delivery being most popular offering. App is built with Flutter and Node.js.

Electro Shop
E-commerce platform built with React/Redux, Node.js, and Express for buying/selling electronic products. App where user can register, login, search, filter, sort, buy and order products. The application has admin functionality and implementation of protected routes.

Cryptotracker
SPA that allows the user to track the values of cryptocurrencies and the value of the cryptocurrencies the user has. The data is shown in the table, one table for each currency. Data is refreshed every 60 seconds.
